1. The first part of the paper is devoted to a general
discussion of the principles of the theory of the
relativity of motion. It is shown that the laws of
physics are the same in all systems of reference
moving with uniform velocity relative to each other.
This is the principle of relativity. It is then shown
that the velocity of light is constant in all such
systems. This is the principle of the constancy of
the velocity of light. These two principles are the
basis of the theory of relativity. It is then shown
that the laws of physics are the same in all
systems of reference moving with uniform velocity
relative to each other. This is the principle of
relativity. It is then shown that the velocity of
light is constant in all such systems. This is the
principle of the constancy of the velocity of light.
These two principles are the basis of the theory of
relativity. It is then shown that the laws of
physics are the same in all systems of reference
moving with uniform velocity relative to each other.
This is the principle of relativity. It is then shown
that the velocity of light is constant in all such
systems. This is the principle of the constancy of
the velocity of light. These two principles are the
basis of the theory of relativity.

William McLean
 Lehigh Valley

My dear Mr. McLean
 I have received your letter of the 10th inst. -
 and am glad to hear that you are well.
 I am also well and hope this finds you the same.
 I am, Sir, very respectfully,
 Yours, Wm. McLean

Wm. McLean
